Medicare Hospital Equipment

Speciality Products

À

From Metro toÀ Medela from Nidek to Detecto! These products are part of our Speciality Range. We have achieved a sizeable chunk of the market in the respective fields. Quality is key, Service back up and support is of paramount importance and with the help of the manufacturer these essentials are covered

Metro

Shelving, carts and workstations are the foundation of InterMetro's Healthcare Division. Their vast array of shelving products in wire, solid metal and polymer were developed to meet various storage needs for medical environments. Cart lines are available in polymer

or metal for use as emergency carts, procedure carts, medication carts, surgical case carts, supply/exchange carts and utility carts. Work stations range from modular WorkCenters used as casework, pick stations and prep areas to flexible workbenches for sterile processing and biomed repairs. Shelving, carts, work stations and accessories are found in all major departments of hospitals, long term care facilities, physician offices and specialty healthcare facilities worldwide.
